Dennison Diaper Liners

Center Diaper Liner on folded diaper about two inches from top.

Place baby on Diaper Liner, with the top well above baby's waist.

Fold diaper up between baby's legs, smooth out sides.

Use two safety pins on each side. Do not pin the Liner.

PROTECT AGAINST DIAPER IRRITATIONS Cloth diapers may retain impurities — uric acid, soap alkalies — which frequently cause painful irritations (diaper rash). Dennison Diaper Liners help to eliminate this cause of diaper rash.

NO CHAFING Dry or wet, Dennison Diaper Liners are soft and smooth. They will not chafe the tenderest skin.

EASILY DISPOSED OF When the diaper needs changing simply remove the soiled Liner and flush it down the toilet. No unpleasant odor remains in the house.

ELIMINATE UNPLEASANT DIAPER WASHING No disagreeable soaking and scrubbing of soiled diapers is necessary. Diapers are easier to

wash when Dennison Diaper Liners are used. Save time and labor.

KEEP DIAPER FROM SOILING One Dennison Diaper Liner keeps the diaper from customary soiling. Two Liners will entirely prevent staining in most cases. At night, or when a loose bowel movement is expected, two or three Liners are recommended.

RECOMMENDED BY DOCTORS Many doctors, nurses and hospitals say: "Use a Dennison Diaper Liner every time the diaper is changed and you will reduce the risk of painful irritations."

SURPRISINGLY INEXPENSIVE Dennison Diaper Liners afford sanitary protection and are so inexpensive that they may be used every time the diaper is used. A few cents a day eliminates hours of diaper drudgery.
