

An Envelope Romper
(Excella E 3592)

Is easily adjusted because it opens flat. The child can be laid upon the garment and quickly buttoned into it.

Small pleats at the side seams provide extra room which is always needed for the comfort of creeping babies. Inverted plaits at the back and front make the garment fit comfortably at the shoulder.

Materials that tailor neatly, are durable, comfortable and resistant to soil are the best for rompers.
